PHILIPS

Highlights

2Mic stereo recording

The two built-in stereo microphones are designed to deliver clear voice recordings and reduce background noise, even in noisy environments. High-quality recording is essential for clear playback and accurate speech recognition results.

MP3 recording

Capture your recordings in MP3. The popular file format allows you to play back your files virtually anywhere and simply share them with others.

Voice-activated recording

Voice-activated recording is a convenient feature for hands-free recording. When enabled, recording will start automatically when you begin speaking. Recording pauses when you stop and resumes automatically when you begin speaking again.

Speech recognition software

Put an end to tedious typing and create text documents directly from recorded audio files. Dragon NaturallySpeaking speech recognition software automatically converts your recording into a text file.

Automatic transcription

Simply record your documents and notes, connect the recorder to the computer, click the 'Transcribe' button and Dragon NaturallySpeaking speech recognition software does the transcription work for you.

Exceptional accuracy

Dragon NaturallySpeaking speech recognition software provides an astounding accuracy rate of up to 99 % and accuracy continues to increase the more you use the software. Dragon also never misspells a word, so typos are a thing of the past.

Large color display

The large color display offers sharp images, making it easier to see and read everything at first glance. The clear user interface supports eight languages and is optimized for easy, intuitive operation.

4 GB internal memory

Capture and store up to 44 days of continuous recording thanks to the 4 GB of internal memory.

MicroSD memory card slot

Virtually unlimited recording and storage capacity thanks to a microSD memory card slot supporting up to 32 GB of additional memory.
